

Unlocking Sustainable Freight with Smart Charging Solutions

The next step in the evolution of road freight

Einride is transforming the road freight industry as we know it today

Freight
Mobility

Digital platform

Energy & Charging
Infrastructure

Understanding the challenges in order to address them

Grid capacity and accessible information

Grid reliability and peak demand management

Transparency of charging infrastructure availability

Charging speed and downtime

Planning and permitting

Optimizing resources: Key solutions for smart charging

Incentives and tariffs for flexibility

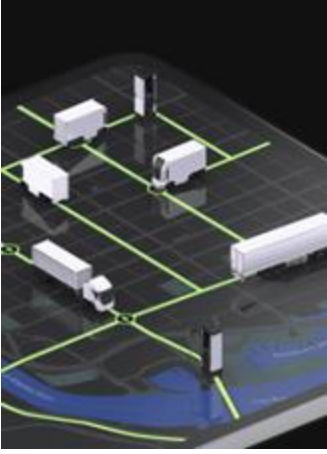

Dynamic load and charging management

Peak shaving and energy storage

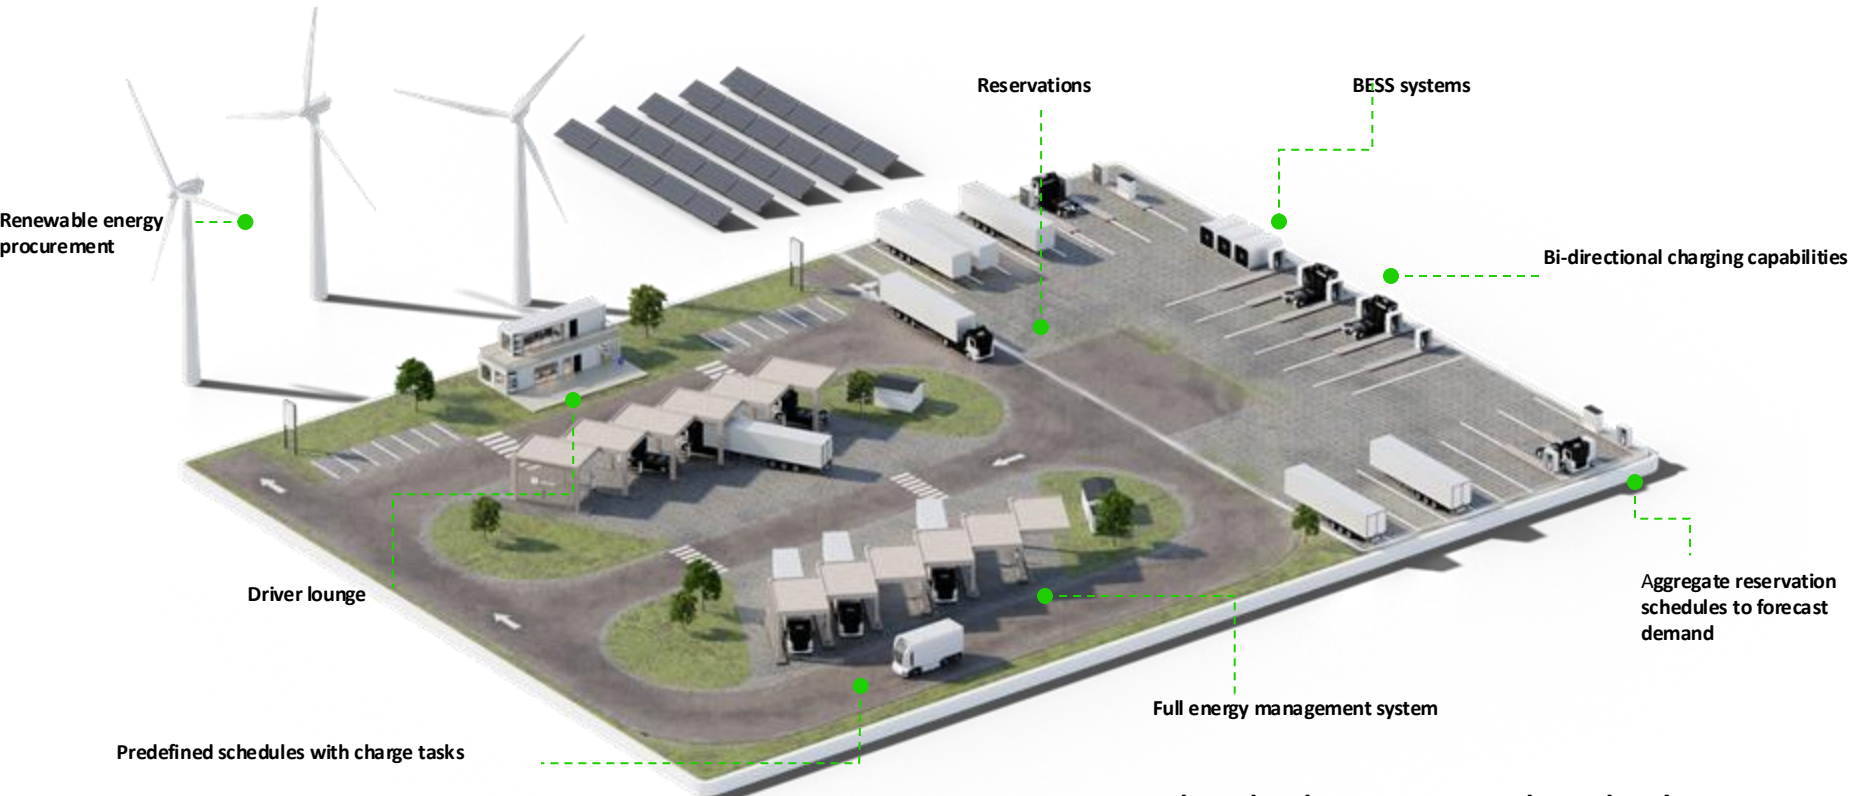

Pre-scheduled and priority charging

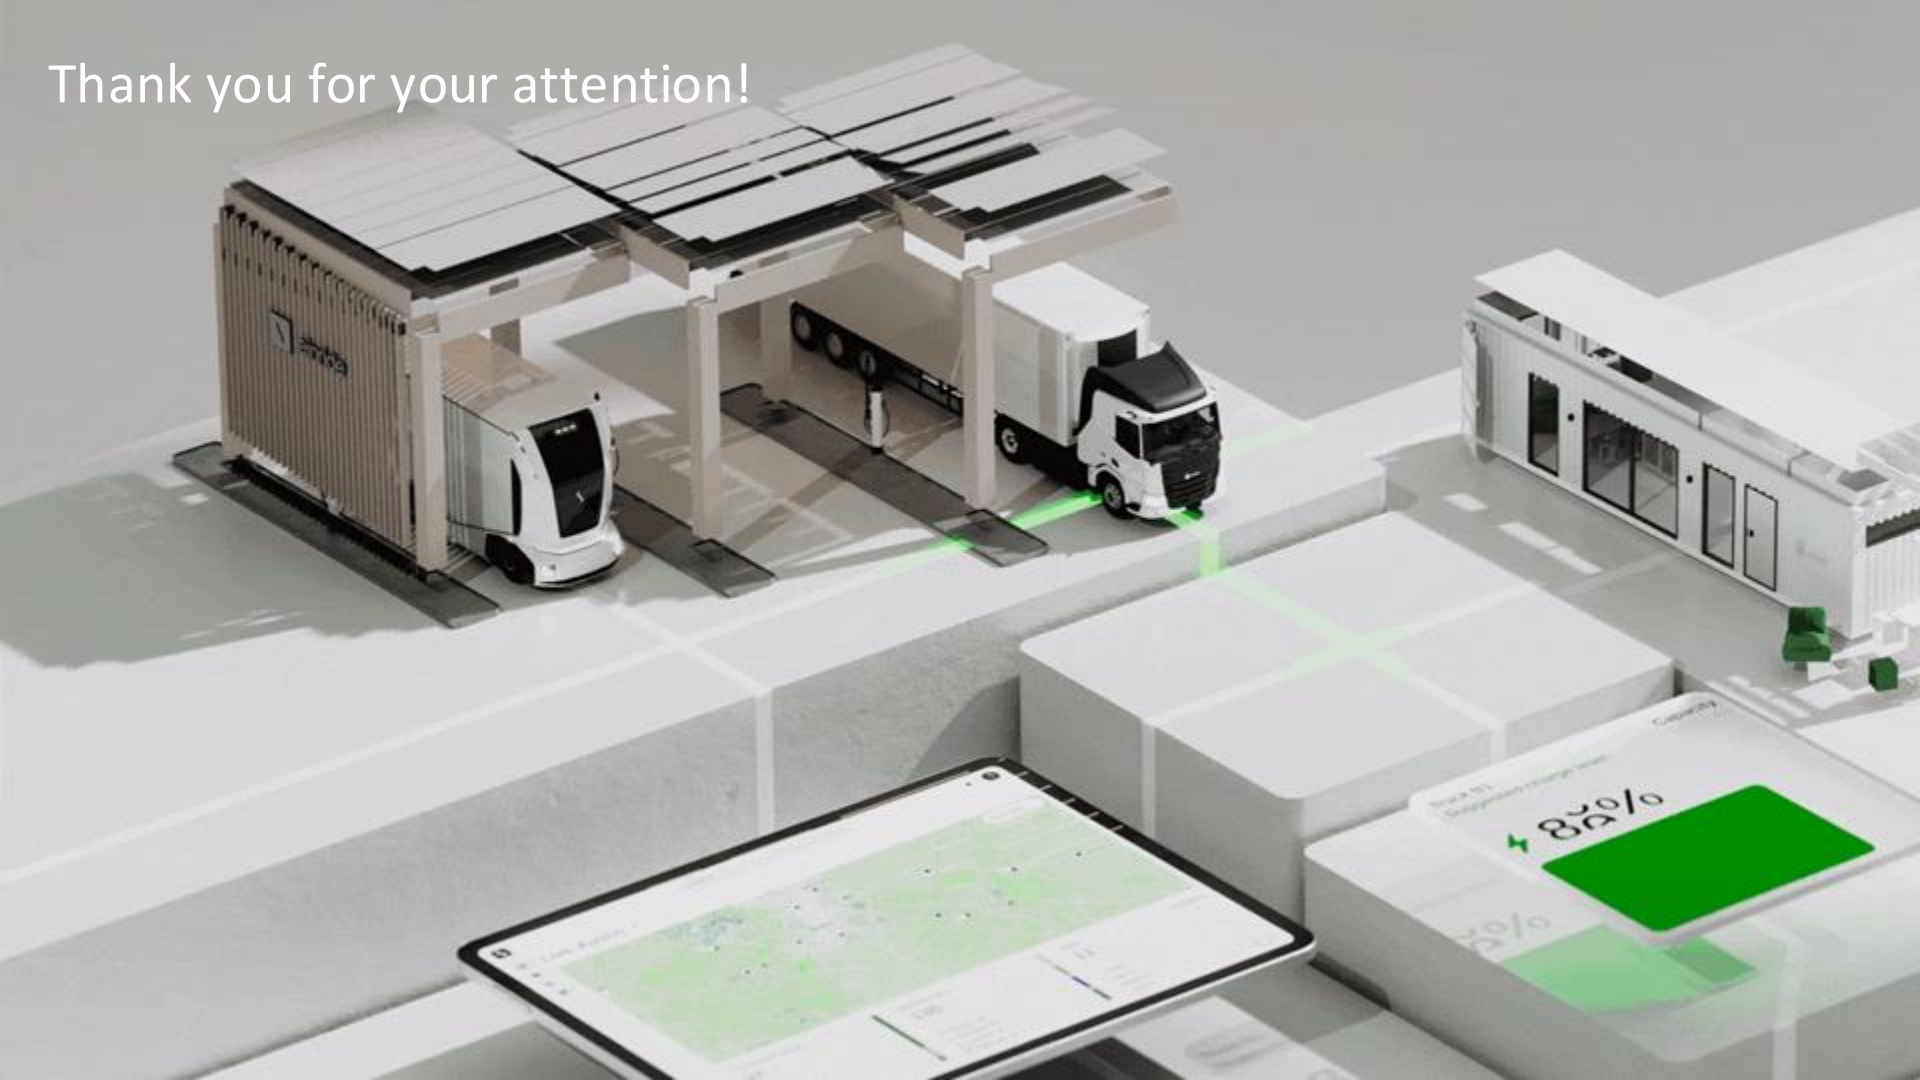

Data-driven optimization and long-term Infrastructure

Smart charging maximizes efficiency, optimizes resources, and accelerates zero-emission transport

With a little, we can do a lot!

Thank you for your attention!
