Why we joined Nordic+?

nordic+
connected and sustainable

1. Being part of Nordic+ pavilion in industry events
2. Being part of neighbouring countries largest transportation, mobility and logistics community
3. Possibility to work on common export projects
4. Possibility to learn from neighbours
5. Easier to find partners for different EU calls

dots.

Positive factors

1. Being part of largest and most visited booth in the industry events.
2. Being part of best evening event Nordic+ nights in the industry events.
3. Friendly communication between Nordic+ family members.

Do's / Don'ts

1. Prepare for the events really in advance. Start preparation at least 1,5 – 2 month before the event.
2. For events it is important to be on the stage, so we recommend to submit panel discussion or special interest session or any other session.
3. It is nice to have small side events, as many industry players, partners and customers are attending these events. Best in the same building as the event is happening. We have good experience with InterTraffic.
4. Invest time in long-term partnerships.

How can Nordic+ help to scale in Nordic and elsewhere?

1. More cross border events within the Nordic+ family itself.
2. More common workshops involving public, private sector representatives in different directions, with goal to work on common projects, industry standards.
3. Participation in more industry events with common Nordic+ pavilion (in Europe and others).

nordic+
connected and sustainable

THANK YOU!
