

NEMU: Nordic Ecosystem Mobility Unlimited

Seamless, integrated and people-centric mobility in the Nordics
and beyond

Powered by open mobility data – EU regulation compliant

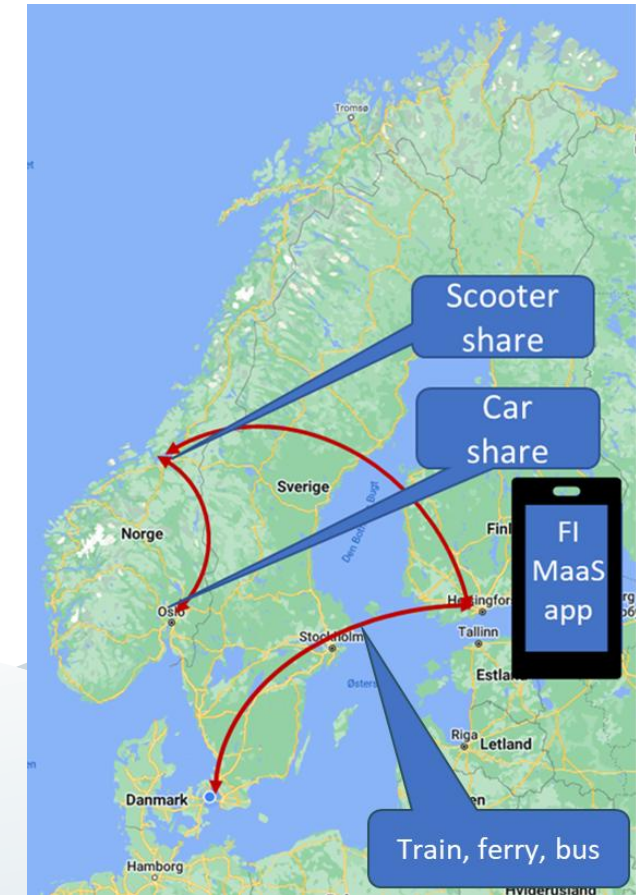

Søren Sørensen, Project manager nemu
sos@sfmcon.com

The NEMU Vision: MaaS Roaming 2030

Roam like home

Plan, book and pay for mobility services for any journey in and between the Nordic countries in one go - using your “home” mobility services app - your language – your currency

Ground and sea mobility borderless in one go

MaaS emerging on National level in the Nordics

Next step: **Roam like home** on journeys outside direct reach of each MaaS agent.

Use your favourite app – your language – your currency anywhere in the Nordics

Scalable to European level.....

Open Trip Planner for the Nordics

Travel plan suggestions including pricing between any two addresses in the Nordics – in one go

Consolidates NeTEx and SIRI open mobility data from National access points in Norway, Sweden, Denmark and Finland

An open source service for Mobility as a service actors in the Nordics powered by **OpenTripPlanner**

Activity	Status	Elaboration
Open Trip Planner for the Nordics	Concept tested	Verified that a Nordic Open Trip Planner is doable. Await fully compliance with Nordic NeTEx. Also how should the service be available for Nordic MaaS agents.
Oslo-Copenhagen in one go	In operation	Through Entur it is possible to book and pay for trips from anywhere in Norway to Copenhagen through Sweden
Helsinki-Oslo in one go	Cross border to Stockholm in operation	Matkahoulto has extended coverage from Finland to include cross border ferries to Stockholm and Tallinn
Roaming Agreements	Outstanding	Entur has agreements with third parties outside Norway which can be used to inspire the roaming agreement framework Use Entur and Matkahoulto as test for establishing a roaming agreement.
Alignment on standards for open mobility data following Nordic NeTEx and SIRI	Outstanding	Probably the biggest obstacle for establishing a high quality consolidated OpenTripPlanner with panNordic coverage.
Final report and conference	To be planned	Project ends June 27. Final conference in June
